## ABOUT THE AUTHORS

### Arman Jabbari

Arman Jabbari received his B.Sc. and M.Sc. in Industrial Engineering from Sharif University of Technology in 2013 and 2015. Given his interest in optimization, he found it optimal to pursue his education at one of the best engineering schools in the world: UC Berkeley.

He received his second M.Sc. from UC Berkeley in 2016, and he is pursuing his Ph.D. in Industrial Engineering and Operations Research, which is expected to be granted in 2020. During his graduate studies, he developed an interest in project supply chain management, where he can apply his passion for optimization to overcome real-world obstacles.

### Philip Kaminsky

Phil Kaminsky received his B.S. in Chemical Engineering from Columbia University in 1989, and his M.S. and PhD in Industrial Engineering and Management Science from Northwestern University in 1997. Before graduate school, he worked in production engineering and control at Merck in Rahway, New Jersey.

Professor Kaminsky is the faculty director of the Center for Entrepreneurship and Technology, and director of the Initiative for Research in Biopharmaceutical Operations. He became department chair of Industrial Engineering and Operations Research at UC Berkeley in 2012.
